Hi Micke!

My name is Andrzej (Andrew), I'm 23 years old and from Warsaw, Poland. I have an engineering degree in Computer Science, and currently I'm doing my Master's in Cybersecurity at Warsaw University of Technology.

I was accepted at Chalmers University of Technology for an Erasmus+ exchange. I'm going to study Computer Systems and Cybersecurity at the Department of Computer Science and Engineering. For now I've been accepted for the autumn semester (August 2026 — January 2027), but I'm seriously considering staying for the full academic year, especially since the summer courses in my program seem really interesting (much more than the courses at my home university :)).

My whole life I've lived in a medium-sized flat with my parents and two younger brothers, so I'm used to sharing my living space with other people and caring for both private and shared areas. For the same reason I'm not the type of person who would throw a party at my place — at home I always go out to have fun. For me, home is a safe space where I can both work and rest without any trouble and where everyone feels respected and comfortable, and that's what I'm looking for in my place in Göteborg.

I love having everything organised, I usually make myself a schedule and then follow it. I'm a non-smoker and a sports person — I love running, swimming, playing basketball and going to the gym. I follow the NBA and Formula 1.

Feel free to contact me with any questions.

Best regards,
Andrzej Pultyn
